Compulsory Task 3

Follow these steps:

- Create a new file called **while.py**.

- Write a program that always asks the user to enter a number.

- When the user enters -1, the program should stop requesting the user to enter a number,

- The program must then calculate the average of the numbers entered, excluding the -1.

- Make use of the *while loop* repetition structure to implement the program.

- Compile, save, and run your file.
